## **Up to 28.11% provisional duties imposed on colour-coated steel from China**

---

ArcelorMittal South Africa Ltd and Safal Steel (Pty) Ltd made an application to ITAC alleging that, dumping of colour-coated steel imported from China was taking place in the Southern Customs Union (SACU) market. Colour-coated steel is predominantly used in the appliance industry, as well as in the construction and automotive industries.

After reviewing the evidence at its disposal, the Commission made a preliminary finding that, the subject product originating in or imported from China is being dumped onto the SACU market, causing material injury and a threat of material injury to the SACU industry.

As a result, the Commission has requested the Commissioner of the South African Revenue Service to impose provisional measures of up to 28,11% on imports of the subject product for a period of 6 months. These provisional measures were implemented by SARS on 28 August 2026.

ITAC is now inviting public comments on its preliminary findings. Interested parties can submit written comments within 14 days of the release of the preliminary report.

Please refer to [Report 788](#) for full details.
