

**ANNEXURE “A”**

**REF. NO: 14/3/2**

**Mr Parks Tau**  
Minister of Trade, Industry and Competition  
Private Bag X84  
**PRETORIA**  
0001

Dear Minister

**MINUTE M13/2025: REDUCTION IN THE RATES OF CUSTOMS DUTY ON WHEAT AND WHEATEN FLOUR IN TERMS OF THE EXISTING VARIABLE TARIFF FORMULA**

In terms of the reviewed and approved variable tariff formula for wheat, the customs duty on wheat is calculated as the difference between the domestic reference price for wheat of US\$279.00/ton and the current 3-week moving average of the US No. 2 HRW (ord) Gulf settlement price for wheat. Adjustments to the level of protection are effected when the difference between the current 3-week moving average price and the 3-week moving average price on which the last duty triggered was calculated amounts to more than US\$10/ton for 3 consecutive weeks. The resulting Dollar duty will be converted to Rand, based on the Rand/Dollar exchange rate prevailing on the day that the adjustment is triggered and subsequently adjusted with the latest available Real Effective Exchange Rate Index, as published by the South African Reserve Bank.

The International Trade Administration Commission of South Africa (“ITAC”) considers adjustments in the customs duty on wheat, once the conditions for an adjustment, as described above, are met.

---

Wheat pricing information, confirmed by the South African Grain Information Service (“SAGIS”), indicated that conditions for a downward adjustment in the customs duty were met on 17 March 2026, when the 3-week moving average of the US No. 2 HRW (ord) Gulf settlement price for wheat triggered an adjustment at US\$271.00/ton. The corresponding Rand/US Dollar (R/US\$) exchange rate was R16.7297 to US\$1.00. If the domestic reference price, the 3-week moving average Gulf Settlement price, the R/US\$ exchange rate on 17 March 2026 and the latest available Real Effective Exchange Rate (“REER”)<sup>1</sup> are applied to the formula, the customs duty on wheat needs to be adjusted downwards from 61.90c/kg to 15.37c/kg.

As the customs duty on wheaten flour is set in the form of a specific duty at the level of 150% of the rate applicable to wheat, the customs duty on wheaten flour also needs to be similarly reduced from 92.85c/kg to 23.05c/kg.

In light of the above, ITAC hereby recommends that the rate of customs duties on wheat and wheaten flour, classifiable under tariff headings 1001.9 and 1101.00, be reduced from 61.90c/kg and 92.85c/kg to 15.37c/kg and 23.05c/kg, respectively.

Yours sincerely

---

**Ayabonga Cawe**  
Chief Commissioner

**Date: 25 March 2026**

---

<sup>1</sup> The REER is a lagging indicator, currently being 114.82 for December 2025, as published by the South African Reserve Bank. (<https://www.resbank.co.za/content/dam/sarb/publications/monthly-releases/monthly-release-of-selected-data/2026/february-data-444.pdf>).
